

The background features a complex network of thin grey lines and dots, forming a web-like structure. Scattered throughout are various triangles of different sizes and orientations, some with solid black dots at their vertices. The overall aesthetic is technical and modern.

# Jupiter.Data.Flow

We provide custom *solution*  
to unique *problems*

# Option vs Solution

Virtualization isn't always an *option*. Sometimes you require custom *solutions*.

---

# Equipment Host Responsibilities

# Our Services

## What we do:

We are an expanding company providing the service to access smart phones remotely among other services. For this we require *Equipment Hosts* to obtain, maintain and host our equipment. Our main business partners use this service for monitoring their ads or to monitor other companies ads to make sure they are following the rules and regulations established in the countries where they are publishing the ads

# How we do it

We work with a handful of companies that will connect to the phones in your location and monitor advertising.

**Office in London**

Using applications like Teamviewer we will remotely connect to smart phones in your location.

\* We provide the smart phones

**Your Location**

# What we need from you / Responsibilities

## What we need from you:

- Broadband connection or 4G router at your location.
  - Our monitoring is mainly done using a 4G / 3G connection since the ads we monitor only appear when 4G / 3G is active.
- Use your wifi connection.
  - Even though our main work is using a 4G / 3G connection we require to use wifi since some of our work will require it
- Strong 3G/4G reception on all major mobile operators

### Adult Ad Monitoring

Our business partners monitor all types of ads. These might be hosted in popular sites like Youtube, or news websites in your country. But they also monitor websites with adult content or websites where gambling is advertised. If you want a further explanation feel to contact us regarding this. This only applies where adult content is allowed.

## Your responsibilities

- Perform regular checks on the devices to make sure that both WiFi or 3G/4G data are enabled.
- Keep the phones connected to their charger 24/7.
  - The applications we use require a lot of battery so it's easier for the phones to be connected constantly even if the battery is full
- Recharge credit for the phones with credit and purchase data-packages the phones.
- To be responsive and proactive to carry out what's needed from us at your earliest convenience. Our working hours are London based (9-5)

### Sometimes we will require for the following:

- Purchase of sim cards for the phones. We will need you to purchase the required sims at the beginning. We'll take care of all expenses.
- To buy new batteries for the phones when needed, along with chargers or/and other similar accessories if needed. **We'll take care of all expenses**

# Steps

## Have an initial interview

We will arrange an initial interview to assess if you are a good candidate

## Check your connection

We will send a document to fill in to make sure your speeds can support remote access

## People Per Hour / Freelancer

Agree on a payment amount and method on PPH or Freelancer

## Send Phones

We will arrange phones to be sent to your location

## Connect Phones

You will help us install all the necessary software so we can connect to the phones

## Done

One month after we have access to the phones we will release payment through People Per Hour or Freelancer

# Contact us

What ever may be the task you have in mind consult with us and we'll do our best to come up with a costume ***solution*** to your unique ***problem***.
